CHEMICAL SOLVING

## **ACCICAL**

### **SANITIZING DESCALING DETERGENT**

ACCICAL is a liquid product with a triple action: cleanser, sanitizer and descaler. It is formulated to meet with the needs of communities and community areas, food industries etc., in order to simplify maintenance operations.

It is formulated with padded acids, calibrated and sanitizing surfactants, that are specifically active against a wide spectrum of bacteria.

Just by wiping once, ACCICAL eliminates calcareous residuals, mineral stains, dirt, grease, etc., and it destroys hidden bacteria in the dirt.

It is used to cleanse and descale ceramic and porcelain in restrooms, stainless steel, aluminum and copper alloys of pots, taps, showers, cookers, etc.

#### **DIRECTIONS**

It is used diluted in water from 1% to 50% ratio, based on the type and quantity of dirt and scaling.

Rinse copiously with water after using.

#### **PRECAUTIONS**

Refer to the safety data sheet.
