SCENTED AMMONIA BASED DETERGENT FOR TOILET SURFACES

It is a viscous scented ready for use detergent containing ammonia. It is specially formulated for all daily cleaning operations on the toilet surfaces and when a strong action is required to dissolve dirt, particularly from sanitary ware, tiles, washbasins, marble floors, bathtubs, faucets, etc.

It removes grease residuals, thin limestone layers from ceramics, chrome plated brass or stainless steel giving again the surface a subtle sheen. Even if the product contains ammonia, it leaves a pleasant scent in the air after its use.

DIRECTIONS FOR USE

It is used as received in small doses according to the level of dirt found. Apply on surfaces with sponges, sponge cloths, brushes. Rinse with clean water, cold or warm.

PRECAUTIONS

Refer to the material safety data sheet
