

TECHNICAL DATA SHEET

SUPER BOULE N

NEUTRAL RINSE AID FOR RAPID DRYING IN GLASS WASHERS

Neutral rinse aid for faster, more efficient drying of glass and crystalware.

Recommended for use in washing cycles with osmotic systems.

Specially formulated with low-foam surfactants, water softeners, and concentrated rinse agents for optimal performance.

Concentrated rinse aid additive for glasswashing machines, specially formulated to ensure faster drying and quick water runoff on glassware during the final rinse, with outstanding performance on crystal.

CHARACTERISTICS

Neutral liquid detergent

INSTRUCTION FOR USE

Intended for use during the dishwasher rinse cycle at 85°C.

DOSAGE: 2–8 g per 10 liters of water, adjusted according to water hardness and wash cycle.

Recommended dosage via an appropriate dispenser, adjusting the concentration in the rinse water to achieve the desired drying performance.

PRECAUTIONS

Refer to the safety data sheet.
