CHEMICAL SOLVING

RINSE OVEN

Rinse Aid for Self-Cleaning Ovens

Rinse aid specifically designed as an additive in the final rinse cycle of self-cleaning ovens.

It is a mildly acidic formulation, containing surfactants and auxiliaries, with strong anti-foaming properties.

By reducing the surface tension of the rinse water, it promotes immediate drying of the oven surface.

It can also be used with water of high hardness.

INSTRUCTIONS FOR USE

- Activate the washing system and follow the dilution instructions provided by the oven manufacturer.
- Always wear protective goggles and gloves when handling the product.

PRODUCT FOR PROFESSIONAL USE ONLY

STORAGE

Keep the container tightly closed.

Store between 0 and 40°C.

PRECAUTIONS

Refer to the safety data sheet for more information.
