

TECHNICAL DATA SHEET

OVEN 2 IN 1 NP

RINSE AID DETERGENT FOR SELF CLEANING OVENS

Two-in-one detergent specifically designed for closed-circuit ovens equipped with automatic washing systems.

Its formula combines cleaning and rinsing action to prevent streaks on the stainless-steel surfaces of the oven chamber.

This formulation has been developed to deliver an eco-friendly result and a low environmental impact, as it contains no phosphates, phosphorus, or EDTA-based sequestrants.

In addition to the attention given to wastewater from the washing cycle, its strong cleaning power ensures improved removal of residues inside the chamber.

The concentrated formula reduces the amount of detergent required and effectively removes even the most stubborn dirt, such as burnt-on grease.

CHARACTERISTICS

Alkaline liquid detergent

INSTRUCTIONS FOR USE

Use according to the instructions and dosage provided by the manufacturer.

PRECAUTIONS

Refer to the safety data sheet.
