

TECHNICAL DATA SHEET

GREEN OVEN CLEANER POWDER 55g

LOW ENVIRONMENTAL IMPACT POWDER DETERGENT FOR SELF-CLEANING OVENS

Detergent powder designed for the maintenance cycle of self-cleaning ovens.

Powder formulation significantly reduces the time usually required for the solubilization of compact formats, thus allowing a greater amount of time to be dedicated to the washing action.

The single-dose powder packaging is perfectly suited to effectively remove carbon residues and all types of cooking deposits in combi ovens.

Formulation of this powder has a low environmental impact thanks to its composition free from phosphates, phosphorus, and the chelating agent EDTA. With a high concentration of cleaning raw materials, it allows the use of a smaller quantity for each individual washing cycle.

CHARACTERISTICS

Caustic-based powder

INSTRUCTION FOR USE

- Place the powder in the designated compartment indicated by the oven manufacturer. If no compartment is provided, insert the powder on the chamber rack before starting the solubilization cycle as specified by the manufacturer.
- Insert the number of sachets according to the washing instructions provided by the oven manufacturer.
- The powder must be properly dissolved in order to perform its degreasing and decarbonizing action on the treated parts. Therefore, a water temperature of at least 85°C is recommended to complete its dissolution phase
- At the end of the washing phase, always start rinse cycles
- Always handle the powder with protective gloves

PRECAUTIONS

Store the product in a cool, dry place, out of reach of children and pets. Use only as directed and avoid direct contact with skin or eyes. In case of accidental ingestion, consult a doctor immediately and show the product label or packaging.

Refer to the safety data sheet.
